05	CHRIS: your documents, understood	Centralized Household Records Integration Server
06	Workflows: obligations carried through to done	How workflows work, step by step
07	Workflows in practice	A worked example, the safeguards, the $25 Expert option, and each plan
08	Your assistant	Ask in plain English
09	Family, professionals and help	Sharing access, changing plan, getting support

01 Welcome to ORDANIS

ORDANIS brings everything your household owns, owes, pays and keeps into one private, organised place: your properties, accounts, loans, bills, valuables and important documents, with an assistant that knows your records and workflows that carry your obligations through to done.

You can	For example
See the whole picture	Net worth, what's coming due, and everything in one place.
Keep documents organised and findable	Policies, statements, deeds and tax bills in CHRIS (Centralized Household Records Integration Server).
Get obligations done on time	An insurance renewal, an estimated tax payment or a capital call, laid out step by step with dates.
Stay ahead of deadlines	Bills, renewals and tasks, with reminders.
Ask questions in plain English	"When does our home insurance renew?"
Share with the right people	Family members and your accountant or attorney, each with the access you choose.

02 Choosing your plan: Basic, Core and Premier

All three plans give you the same private household record, CHRIS and your assistant. They differ in how much the platform does for you, and whether an ORDANIS Expert works alongside you.

	Basic	Core	Premier
Monthly	$15	$100	$500
Best for	Getting organised	Running your own household administration	Having it run for you
Household record (properties, accounts, loans, bills, valuables, tasks)	✓	✓	✓
CHRIS document storage	5 GB	15 GB	25 GB
AI assistant	✓	✓	✓
Task and bill reminders by email	✓	✓	Handled by your Expert
Workflows	—	10 active included, then $8/month each	Unlimited, run by your Expert
Obligations, scheduled reports, resources	—	✓	✓
Professional (Business Partner) seats	—	$5/month each	Included
ORDANIS Expert	—	**Optional: $25 per workflow**	Named Expert for everything
Bill pay and payment register	—	—	✓
Who does the work	You	You, with ORDANIS preparing each step (or an Expert on any workflow you choose)	Your ORDANIS Expert, with you kept informed

Prices as of this guide's date. Outside costs, such as a bill-payment provider's fees, are separate from your plan.

Which plan is right for you?

- **Basic** if you want everything in one organised, searchable place and reminders so nothing is missed.
- **Core** if you want ORDANIS to lay out and prepare your recurring obligations (renewals, tax payments, trust and estate tasks) while you stay in control, with an Expert available on any single workflow for **$25**.
- **Premier** if you want a named ORDANIS Expert to run your household administration, pay bills and work every workflow.

Moving between Basic and Core is instant from your **Billing** tab. Premier is arranged with our team after you ask.

03 Getting started

1. **Accept your invitation.** Open the email from ORDANIS and choose your own password. Nobody at ORDANIS will ever ask for it.
2. **Turn on two-step verification** when asked. It keeps your household's information yours.
3. **Name your assistant** if you like. It's the name you'll see on "Ask …".
4. **Take the Setup guide.** It walks you through adding your properties, accounts, family members and documents. Reopen it any time from the Summary tab.
5. **Add your first documents to CHRIS.** Photos from your phone are fine.
6. **On Core, start your first workflow** (section 06). Insurance renewal is a good first one.

> **TIP**
>
> You don't have to do everything at once. Start with your home, your main accounts and your insurance policies.

04 Your portal

Tab	What you'll find
Summary	Your net worth, what's coming up, overdue tasks, and the Setup guide.
Household	Family members, your professionals (accountant, attorney, adviser), and who has a login.
Properties	Each property with its value, mortgage, taxes, insurance, the people who look after it, and any loans it secures.
Portfolio	Your accounts and their balances over time.
Loans & Lines	Every loan, line of credit and card. When you add one, choose what secures it: a property, an account, or nothing (unsecured). A mortgage is added straight onto its property.
Cash Flow	Income and bills, with a projection of what's ahead. Tick a bill once it's paid.
Workflows	Your obligations and the step-by-step workflows that carry them (Core and Premier; section 06).
Valuables	Art, jewellery, vehicles and the insurance that covers them.
Tasks	Your to-do list, with reminders.
CHRIS	Your documents (section 05).
Billing	Your plan, payment card, extra workflows, and requests to change plan.
Ask …	Your assistant.

You can add and update your own records on every plan. On Premier, your ORDANIS Expert sees what you've changed, so nothing slips between you.

05 CHRIS: your documents, understood

Meet CHRIS

CHRIS stands for **Centralized Household Records Integration Server**. It is where your household's documents live, and it does far more than store files. CHRIS **reads** every document (even a photo taken on your phone), gives it a clear name and a short summary, **files it** in the right folder, and **connects it** to the part of your records it belongs to. Then you can find anything by what it says, your assistant can answer questions from it, and your workflows can use it.

What CHRIS does for you

- **Reads everything:** PDFs, scans and photos. "IMG_4821" becomes "2026 Homeowners Policy – 12 Oak Lane".
- **Files it:** suggests the folder and the record (a property's tax bill, a valuable's policy, a loan's statement). You confirm with one tap.
- **Fills in details:** reads a policy for the carrier, premium and renewal date, so you don't retype them.
- **Finds by content:** search "flood" or "umbrella" and CHRIS looks inside your documents, not just at file names.
- **Keeps history:** when next year's policy arrives, it takes the old one's place, and last year's stays on file.
- **Answers questions:** your assistant reads CHRIS, so "what's our deductible?" gets a real answer.
- **Powers workflows:** a workflow step can read a renewal notice from CHRIS and file the new policy back into it.

Adding documents

1. Open **CHRIS** and choose 📷 **Snap or add several**.
2. Take photos one after another, or pick files from your computer.
3. Each document becomes a card with CHRIS's suggested name, folder and link. Change anything you like.
4. Tap **File**. Done.

You can also attach a document right where it belongs: click the paperclip next to a figure, such as Property Taxes.

Your Private folder

Every person with a login has a **Private** folder in CHRIS. Only you can see what's in it (not your family, not ORDANIS), and it is never read by AI.

06 Workflows: obligations carried through to done

What a workflow is

Some things a household must do are not one task but a sequence with deadlines: renewing insurance, paying estimated taxes, funding a trust, answering a capital call. A **workflow** is the proven sequence of steps for one of these, already written. You tell ORDANIS what the obligation is and when it is due; ORDANIS lays out every step on your calendar, counted back from the due date, prepares the emails and letters for you, and tracks each step until it is done.

Four words to know

Word	Meaning	Example
Obligation	Something your household must do, with a due date, and often a repeat.	"Home and auto insurance renewal, every June 1"
Workflow	The ready-made playbook that carries it: the steps, who does each, and how far ahead.	"Insurance renewal — all lines" (8 steps, starts 60 days out)
Cycle	One run of the workflow for one due date.	"June 2027 renewal"
Step	One action in the cycle, with its own date.	"Shop the market — 50 days before"

The workflow library

ORDANIS comes with **49 workflows** written and reviewed by family-office professionals, in nine areas:

Area	Workflows
Insurance	Insurance renewal (all lines) · Umbrella coverage review · Life insurance in-force review · ILIT premium funding · Valuables scheduling and appraisal · Flood zone re-determination · Property insurance claim
Tax	Quarterly estimated tax · Required minimum distribution · Partnership K-1 collection · Gift tax return (709) support · Charitable and DAF granting · Multi-state activity review · Foreign account reporting support
Property	Property tax appeal window · Mortgage maturity and refinance · HOA dues · Lease renewal · Seasonal opening and closing · Short-term rental compliance · Contractor onboarding · Home improvement tracking · Vehicle, vessel and aircraft registration

Trusts & Estates	Annual gifting · Trustee review and accounting · Beneficiary designation audit · Trust funding verification · GRAT annuity payment · Intra-family loan interest
Life Events	Birth or adoption · Marriage · A child reaching majority · Relocation to another state · Liquidity event or business sale · Divorce · Incapacity (power of attorney) · Death of a principal (first 30 days)
Governance	Annual family meeting · Education funding review · Cybersecurity review · Digital asset succession · Document retention · Professional network review
Investments	Private fund capital call · Quarterly statement collection
Entities	Annual report and registered agent · Entity document review
Household	Household staff payroll and tax · 1099s for household vendors

You can read every workflow, step by step, before you use it.

Running a workflow, step by step (Core)

1. **Add the obligation.** Open **Workflows** and choose **+ New Obligation**. Pick the workflow first: ORDANIS fills in the name, type, repeat and notes for you.
2. **Add the details.** Enter the **due date** (required), and if they apply, the amount, a later grace date, and a reference such as a policy number or fund name. Some workflows ask a yes/no question (for example, "confirm the figure with your CPA?") that switches optional steps on or off.
3. **Start the cycle.** Press ▶ **Start cycle**. ORDANIS lays out every step against a real calendar date, counted back from the due date. Optional steps you switched off appear as **Not required**, so you can see they were considered.
4. **Check for "At risk".** If you start too late for the workflow's own lead times, the cycle is flagged **At risk** on day one and names the step that has already slipped, so you can act now, not in week six.
5. **Work each step when it comes due.** Each step says what to do, by when, and who does it. What each kind of step asks of you is in the table below.
6. **Approve before anything is sent.** When a step needs an email or letter, ORDANIS prepares the draft from your records and documents. You read it, change anything, and choose **Approve & send**, or **Approve, don't send** to send later.
7. **Finish.** The cycle closes itself once nothing is left to do. A repeating obligation stays on file, ready for its next cycle.

What each kind of step asks of you

Step	What happens

Read a document	ORDANIS reads the renewal notice, statement or bill from CHRIS and pulls out what matters.
Check or compare	ORDANIS compares figures (this year's premium against last year's, say) and shows you the result to confirm.
Draft an email or letter	Choose **Prepare draft**. ORDANIS writes it from your records; you edit and approve it. Your household's primary contact is copied, so nothing is done in your name without you seeing it.
Confirm	Something you or an outside party does (a payment posts, a binder arrives). Choose **Mark done** when it has happened.
File	The result (a new policy, a payment confirmation) goes into CHRIS, linked to the right record.

Steps marked for an ORDANIS Expert are yours to do on Core, with ORDANIS preparing them for you, unless you add an Expert to that workflow (section 07).

What the step labels mean

Label	Meaning
Upcoming	Its date hasn't arrived yet.
Ready	Due now; you can act on it.
Needs approval	A draft is waiting for you to read and approve.
Approved — not sent	You approved it but it hasn't gone out yet. Approved is not finished.
Sent	The email left ORDANIS and the mail provider accepted it.
Done	Complete.
Not required	An optional step that doesn't apply to you.
Blocked	Waiting on something else first.
At risk	The cycle started too late for at least one step's lead time.
Paused — plan change	Your plan no longer includes workflows. Nothing is lost; it resumes when workflows are back.

07 Workflows in practice

Example: your home and auto insurance renew on June 1

When	Step	Who
April 2 (60 days before)	Renewal notice received and read from CHRIS	ORDANIS
April 7	Compare the renewal against the expiring policy	ORDANIS
April 12	Shop the market (draft email to brokers)	You, or your Expert
April 17	Review the changes with the family or your adviser	You, or your Expert
April 22	Query the agent on any gaps or changes	You, or your Expert
May 12	Authorise the renewal and arrange payment	You, or your Expert
May 27	Binder or new policy received	Your insurer
June 3	File the new policy in CHRIS and update the renewal date	ORDANIS

Safeguards built in

- **Nothing is sent without approval.** Every email and letter waits for a person to approve it, and the approval is recorded.
- **Recipients are checked.** Before sending, ORDANIS checks every address against the contacts on file for your household. An unfamiliar address stops the send and asks first.
- **You are copied.** Your household's primary contact is copied on outbound correspondence.
- **Money never moves on its own.** ORDANIS prepares payment instructions; it never moves money.
- **Nothing looks done that isn't.** "Sent" only appears once the message has actually left; skipped steps stay visible.

Workflows on Core

- **10 active workflows are included.** A workflow counts while its cycle is open; once it completes, it stops counting from your next monthly bill.
- **Need more?** When you start an 11th, ORDANIS offers another slot for **$8/month** for as long as it stays active. You confirm before anything is charged, and an unused slot can be released.

Add an ORDANIS Expert to any workflow: $25

On Core, you run your workflows yourself. When one matters more, or you'd simply rather not handle it, you can add an **ORDANIS Expert** to that single workflow for a **one-time $25**.

- **What you get:** an ORDANIS Expert works that workflow's steps for you: preparing and sending the correspondence, following up, and confirming each step, with you copied throughout.
- **How to add one:** choose **Start + add Expert ($25)** when you start the cycle, or **Add ORDANIS Expert — $25** on a cycle that is already running.
- **How it's charged:** once, to the card on file, per workflow. It isn't a subscription, and it is separate from your plan and any extra workflow slots. If your household's fees are paid by a firm, it goes on the firm's invoice instead.
- **What happens next:** our team assigns an Expert and is in touch.

Good candidates: a property insurance claim, a refinance window, a trust funding verification, or the first 30 days after a death in the family.

Workflows on Premier

- Your named ORDANIS Expert runs every workflow: starting cycles on time, preparing and approving correspondence, following up and filing the results.
- You see every cycle and step in your **Workflows** tab, and you're copied on what goes out in your name.
- No limit on active workflows, and no extra fee per workflow.

On Basic

Basic doesn't include workflows. You can still track obligations as **Tasks** with reminders, and bills in **Cash Flow** with email reminders. Upgrade to Core from **Billing** at any time to start using workflows.

08 Your assistant

Your assistant answers from **your household's own records and documents**, and nobody else's.

Try asking	It looks at
"When does our home insurance renew?"	Your policy in CHRIS
"What bills are due this month?"	Cash Flow
"Is anything uninsured?"	Valuables and their policies
"What's left on the mortgage?"	Properties and Loans & Lines

> **ABOUT INVESTMENT QUESTIONS**
>
> The assistant won't give investment advice. For that, it will point you to your licensed financial adviser.

09 Family, professionals and help

Adding family members

In **Household**, invite a family member by email. Each person gets their own login, and you choose what they can do: **edit records**, **upload documents**, **download documents**, and **manage users and billing**. Presets make it quick: Full access, Documents only, or View only.

Adding your professionals

Give your accountant, attorney or adviser a read-only seat so they can see what they need and upload documents to you ($5/month each on Core; included on Premier).

Your plan

See or change your plan in **Billing**. Moving between Basic and Core is instant; Premier, with your own ORDANIS Expert, is arranged with our team after you ask.

Getting help

- **Premier:** use "Email my ORDANIS Expert" at the top of your portal.
- **Everyone:** ask your assistant how to do something, or email **info@ordanisos.com**.

Your privacy and security

- Your household's information is visible only to your household and the ORDANIS team members assigned to it.
- Documents are stored privately and opened through links that expire. Every download is recorded.
- We will never ask for your password. Turn on two-step verification and keep it on.
